

Practice Task 3

Use of jQuery

Objective:

- Learning the concepts of jQuery
- Practice to add jQuery in html files (You may use internal OR external script).
- Practice using jQuery.

Task:

Write down HTML to create a web page, add buttons into it and write jQuery functions to perform the following tasks given below. Please write COMMENTS in your work else it will not be checked.

1. In HTML, create heading Question 1, a paragraph and two buttons i.e. “Hide Paragraph” and “Show Paragraph”. When you click the button “Hide Paragraph”, the particular paragraph will be hidden. When you click “Show Paragraph”, that paragraph will be shown again using jQuery.
2. On the same HTML page, create heading Question 2, a paragraph and one button i.e. “Change Paragraph”. On clicking the button, the text of paragraph is replaced with some other paragraph using jQuery.
3. On the same page, create heading Question 3, a paragraph and one button i.e. “Change Text Color”. On clicking the button, the color of paragraph is changed using jQuery.
4. After question 3 on the same page, create heading Question 4 and a buttons i.e. “Change Background color of body”. On clicking the button, the background color will be changed using jQuery.

Submission:

- No late submissions will be entertained.
- Submissions in emails not allowed.
