

Practice Task 4 - PHP

Objective:

- Learning the concepts of PHP.
- Practice to add HTML in PHP files.
- Adding comments in PHP.

Task:

1. Declare PHP variables.
2. Storing Values with Assignment Operator.
3. Initializing variables with assignment operator.
4. Add two numbers in PHP.
5. Subtract one number with another with PHP.
6. Multiply two numbers with PHP.
7. Divide one number by another in PHP.
8. Increment a no with PHP.
9. Decrement a no with PHP.
10. Show the use of while, do-while, for loop in PHP.
11. Show the use of if_else condition in PHP.
12. Create an array of students and print it, using PHP.

Instructions:

- Make sure your code should be commented.
- Make a folder and rename it with your roll number only.
- Make a single PHP file and add all code (HTML, PHP) in it. Rename it with your NameRollNumber.php (else you will not get any marks for it)

Submission:

- At Moodle before the deadline.
- No late submissions will be entertained.
- Submissions in emails not allowed.
