

Lab – 03: Responsive Websites and Bootstrap

Objective:

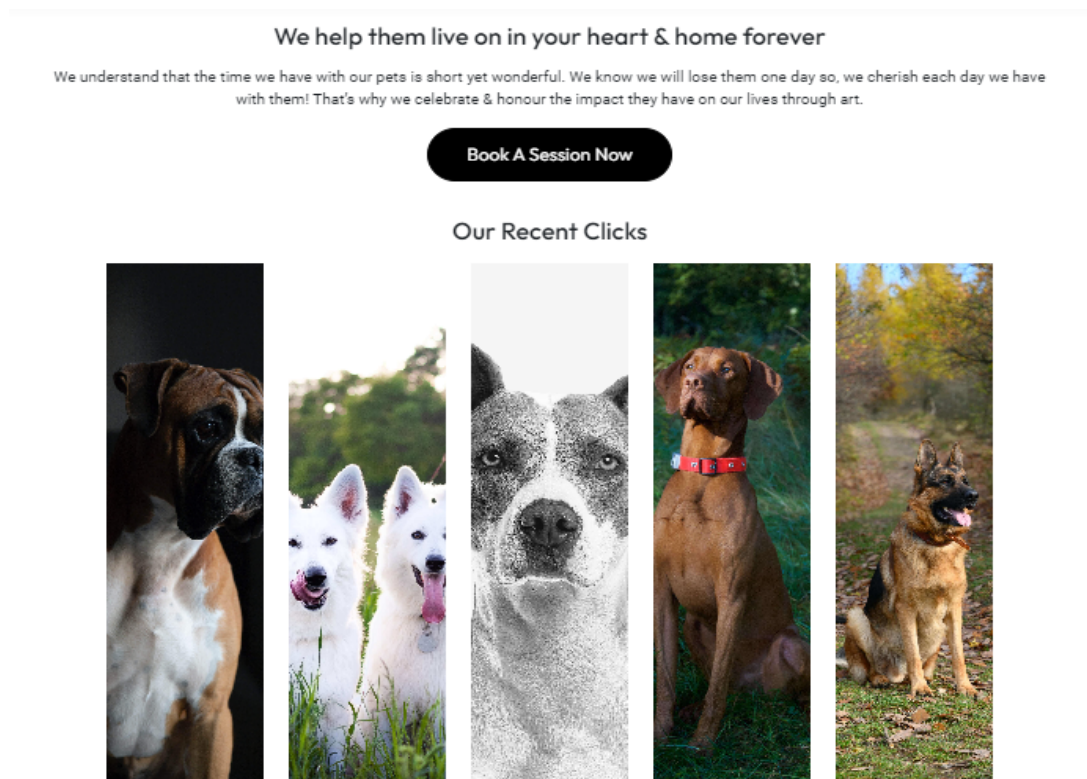

- Learning the concept of responsive website design.
- Practicing how to use media queries.
- Using Bootstrap.

Submission:

- Submission of your work must be made to your GitHub repository.
- Submit a notepad file with the link of your repository.
- **Emailed submissions will be NOT accepted.**
- **Plagiarized work will not be marked**

Task 1: Create an HTML file named “mediaQueries.html” and made the following web design. Images are provided in the assets folder.

For Laptops and Medium screen devices

Bonus Part: When the user hovers over each image, complete image is revealed smoothly.

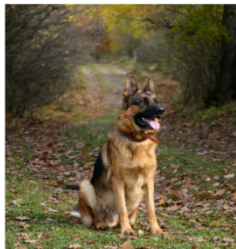

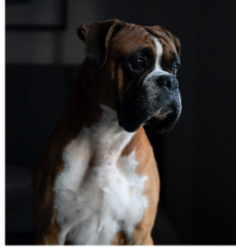

For Small Screen Devices

We help them live on in your heart & home
forever

We understand that the time we have with our pets is short yet wonderful. We know we will lose them one day so, we cherish each day we have with them! That's why we celebrate & honour the impact they have on our lives through art.
